EXPERIENCE

Cegid, Barcelona (Remote - France) — Senior Full Stack

MAR 2022 - OCT 2022

Working in the serverless team (Python-AWS) and PHP team as Senior developer.

Frontend in React using redux, sass, storybook, jest, etc.

Integration team: Aws (lambdas, step functions, dynamoDB, S3, cloudformation, etc).

PHP team: laravel, zend, symfony, etc.

Vibia, Barcelona (SPA) — Technical Lead / Senior Developer

JAN 2020 - MAR 2022

I started as a Senior Developer. Working in the migration legacy code to services oriented architect.

Stack: Nodejs, React, PHP (Zend, Symfony), Mongo.

Also I continue to work as a Technical Lead to coordinate 4 teams (BE team nodejs/php, FE team React, UI team-components UX, Player team Angular/webgl).

Achievements: Digital product migration successfully in order to improve the performance, the product was best seller in the year and we are live with the new struct.

Keywords: CI gitlab, SOLID concepts, docker, AWS, Jenkins, Elasticsearch, Redis, REST, POST, Jira, Storybook, Redux, React native, IOS development, Mocha, firebase.

Triple 888 Studios, Remote Part-time (AUS) — Specialist (Devop, BE, FE)

NOV 2019 - JAN 2020

Advice about architecture, technology and new modules third party.

Keywords: Magento, SASS, Knockoutjs.

Wholesale Flowers And Supplies, Remote Part-Time (EEUU) — Web Developer

JUNE 2017 - JAN 2018

Working in two Ecommerce sites. I've implemented different features, fixed bugs and migrated some data to an external system.

Language Trainers, Remote Part-Time — Software Developer

MAY 2017 - DEC 2017

Migration to Laravel system. I worked as a Backend programmer. (PHP, Laravel)

Evok Advertising , Remote Part-Time — Web Developer

NOV 2016 - MAY 2017

I created two sites with a partner. I developed the Backend/Environment area. I had to create scripts to migrate information to the new database. (PHP, javascript, digital ocean, deploy)

Summa Solutions, Tandil (ARG) — Technical Lead / Senior Developer

2016 - 2019

SummaSolutions is a Magento gold partner company. I've worked on different projects Magento 1.x, Magento 2.x, Laravel, Wordpress such as Backend, Frontend, FullStack and Tech Lead. I've worked with migrations M1 to M2, I've created a gateway with different metrics to connect with external systems. I've prepared the sites for important events like Cyber Monday or Black Friday (stress test with jMeter, quote process in RabbitMQ, etc). I've improved the environments to create dockers for the projects, scripts or changes in the deployment.

Keywords: PHP, PHPUnit, docker, LESS, SASS, GULP, jira, microservices, RabbitMQ, Redis, d3js, Knockoutjs, GTM, GraphQL.

Stormtech, Tandil (ARG) Part time — Fullstack developer Django

2016 - 2019

Working on different Python projects. I worked as a developer and systems analyst . I did features about microservices, integrations and design. Keywords: javascript, sass, jquery.

SIU, Tandil (ARG) — *Software developer*

JUNE 2014 - 2016

I worked in the backend area with a framework in PHP (company framework, D3js).

Unitech, Tandil (ARG) — *Backend developer*

JAN 2014 - JUNE 2014

I worked in the backend area (Java, Flex).

EDUCATION

UNICEN, Tandil (ARG) — *Systems Engineering*

2010 - 2015

Developed Studies until the 4th year of the career. Non-graduate.

UNICEN, Tandil (ARG) — *Systems Analyst*

2007 - 2010.

Dr.Arturo U.Illia, Trelew (ARG) — *Technical Computer*

JAN 2004 - DEC 2006

Technical, Professional technician in personal and professional informatics.

EXTRA

Personal Projects

2020 - 2021.

Created and Published 4 applications in the Apple Store.

Keywords: React native, ios, Xcode, Redux.

Development Frontend

2022 - Present.

I've created a NFT game. I did all the design and the frontal panel with React, the project is in progress but we have 80% finished. I've integrated with web3 (metamask), created all components, multi language, integrated with firebase and deployed.

Keywords: React, Redux, Web3.0, websocket, pretty, eslint, jest, etc.
